long course swimming championships
august 21-24

MT. HOOD COMMUNITY COLLEGE
AQUATIC CENTER
GRESHAM, OREGON

F I N A L R E S U L T S

LOVE YOUR HUMAN MOLES

In this anything-for-a-dollar world it's amazing that some people lost money or took a vacation just to watch you swim your races. Be honest, would your best friend be at the pool while you warmup on the first day of the meet, watch every race, and still be there after the last shower on Sunday?

Clear blue skies, temperatures in the 80's, perfect days for enjoying an Oregon summer. Did you notice the little building at the top of the stadium seats? That's where the human moles lived for over 4 days bringing you accurate times and results. Judy Hathaway and Ruth Hughes were riveted in front of 3 electronic timing consoles. Bob Hathaway fretted over and fixed every missed touch and technical burp. Nancy Dobbs assured accurate final results.

Love your local officials. They gladly give up their weekends to help you swim. Get to know them and you'll know some extraordinary people. If your officials are as good as the Oregon officials, be proud of them.

Swimming runs on volunteer labor. We all thank the many people who made this meet possible. If you didn't help at this meet, try helping at your local meets. It's great fun!

**THESE FINAL RESULTS SUPERCEDE BOTH
THE POSTED EVENT RESULTS AND THE
SUMMARIZED & PRINTED DAILY RESULTS.**

RELAY SPLITS DISCLAIMER

Accurate relay splits in a 9 lane 50 meter pool with swimmers starting at both ends is a challenge to both swimmers and officials. Please keep in mind:

- * The first split in relay is automatically official. The swimmer is verified. A record or a top ten time can be set by the first swimmer.
- * Other splits are for your information only with order of swim unverified. Some of these split times may be inaccurate. Consider:
 - * If a swimmer is slow (more than about 15 seconds) getting out of the pool after their relay leg or if the touchpad is disturbed, subsequent splits will be inaccurate.
 - * As a result of general relay chaos and excited people; wires get stepped on, connections loosen and technology fails.
 - * If a *** is in place of a time the split is too inaccurate to print.
 - * Note that erroneous times occur in pairs - if someone is very, very fast another will probably be very, very slow.
- * Relay splits are in seconds, therefore a 70.23 is a 1:10.23.
- * We hope you like this approach and we welcome your suggestions.
